54	The Step for Excel Solver					
55	1. Put an initial value such as 10 into B18.					
56	2. Set B22 as the target cell.					
57	3. Set B18 as the change cell.					
58	4. Restrict that B37=0.05.					
59	5. Minimze the target cell.
